DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed November 25, 2008 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joel Justiss on February 13, 2009.

[Begin Audit]

IN THE CLAIMS:

Claims 47 and 49 have been amended as follows:

47. (Currently Amended) A portable electronic communication apparatus having a single display and at least three modes of operation, said three modes including a first user-interface comprising said display and a second user interface comprising a keypad, the apparatus including:

first and second housing members each having a first surface and an opposite second surface,

the first user interface being provided at the first surface of the first housing member and the second user interface being provided at the first surface of the second member, and

a connecting mechanism for movably connecting the first and second housing members,

wherein a position of the first and second members relative to each other determines a mode of operation of the apparatus as determined by the user such that:

when the first and second housing members are connected and positioned together in a second closed position such that the second surface of the first housing member is closed toward one surface of the other housing member such that the first user interface and the second user interface are fully accessible, the apparatus is in a first user-selected mode of operation;

when the first and second housing members are connected and positioned together in a first closed position such that the first surface of the first member is closed toward one surface of the other member such that the first user interface and the second user interface are inaccessible, the

apparatus is in a second user-selected mode of operation; wherein said first and second user-selected modes are selected from the group consisting of:

a standby mode of operation in which the first user interface is active and the second user interface is inactive; and

an inactive mode of operation in which both the first the first user interface and the second user interface are inactive; and

when the first and second housing members are connected and positioned apart from each other in an open position, the apparatus comprises a fully operational active mode of operation in which both the first user interface and the second user interface are fully accessible and active.

49. (Currently Amended) The portable electronic communication apparatus of Claim 47, wherein said first and second user-selected modes are different modes.

[End Audit]

Claim 48 has been cancelled.

Allowable Subject Matter

3. Claims 1, 5, 12-14, 17, 27, 36-47 and 49 are allowed.

The following is the examiner's statement of reasons for allowance: Prior art fails to teach or suggest directly or indirectly the limitation "when the first and second housing

members are connected and positioned together in a first closed position such that the first surface of the first member is closed toward one surface of the other member such that the first user interface and the second user interface are inaccessible, the apparatus is in a second user-selected mode of operation; wherein said first and second user-selected modes are selected from the group consisting of a standby mode of operation in which the first user interface is active and the second user interface is inactive” in combination with other limitation of the claims.

Any comments necessary by applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance”.
